Evolve

Choosing a home energy storage system to match your energy needs is a wise investment that will secure your energy future well into the next decade. But one size does not fit all, and what if your energy needs change? Buying an electric car? Adding a backyard pool?

Introducing the Eguana Evolve, a fully integrated and expandable home energy storage solution with 5 kW of power, and with storage capacity starting at 13 kWh -- all the way up to 39 kWh! Serious storage for the serious consumer.

Eguana's technologies are embedded in home energy storage systems that are reducing power bills for over 5000 (and growing) owners around the globe. Now integrated with LG Chem's award winning modular lithium battery, Eguana is proud to bring our technology to a broader market with energy storage solutions you can trust.

Our AC coupled solution is the perfect match for retrofit or new grid tied PV, and with integrated backup and black start capability, your power stays on when your grid goes dark.
